AMELA Board Meeting
4/18/19

Meeting Time: 9:30 pm – 9:42pm

Members Present:
    Gavin Kremer
    Zach Kaufman
    Eli Zupke

Clara and Kendall had other commitments.

What was accomplished:
    Gavin worked on updated rental model to include time and duration, but could not update current relationship in database so he started from scratch. During the meeting, he realized he could just delete the field and will do so next time.

    Zach updated media search to have pagination that's consistent with the rest of our site. Made a cookie that remembers where users quit a movie from, but is causing problems with some web browsers.

    Clara made minor details to the search window. Added a filtered search popup.

    Kendall made a script that sends inbox messages and email notifications at the same time.

    Eli wrote some test cases and discovered bug that causes search bar to show the word 'on' when you don't enter anything and go to search page.

Goals for next meeting:
    Filters as a drop menu
    Need to implement JWPlayer API.
    Update rental model.
